

SPECIAL POWER SYSTEMS

10KVA -1MVA

Special and reinforced special power electronic products that respond to different industrial needs in harsh environmental conditions and differ in terms of dimensions, input output parameters, etc. are designed and manufactured.

CONTAINER TYPE POWER ELECTRICITY SYSTEMS

It is a secure, weatherproof and fire-protected, easy-to-install, integrated, scalable-on-demand mobile power system where IT infrastructure and generator are integrated and presented together in a container for special and remote applications.

Container Power Systems, which include power protection, cooling, fire control, security and central environment monitoring management, are all-in-one for all kinds of remote and special applications with high efficiency, fast placement, easy location change, energy saving and flexibility, and provide users with the lowest total cost of ownership by minimizing energy consumption.

FEATURES

All-in-one container UPS system including power supply, distribution, cooling, fire suppression, environmental monitoring and generator

Wide range of modules from 10-1000kVA

Each 1MW power module can be scaled up to xx MVA

96% high efficiency

Integrated transfer and bypass switches

Mounting in 20" or 40" containers

Easy maintenance, easy accessibility with entry-exit doors

Full digital control of UPS, panel and all units

Fire detector and extinguishing system

Air-conditioned UPS and battery rooms

Environmental monitoring management
